About RISE: This is a 10-week summer research opportunity targeting *underrepresented students* interested in bioenergy research. Students seeking experience in plant biology, agronomy, synthetic biology, genetics, environmental sciences, chemical engineering, and civil engineering are welcome to apply!

The Plan: Students will be paired with a CABBI mentor, conduct research, attend career development seminars, learn about the graduate school application process, and practice STEM communication by presenting research at a summer symposium. Some projects are designed to be done virtually; others have in-person aspects that will be carried out following COVID safety guidelines.

Program Dates:
June 1-Aug. 6, 2021

Project Descriptions: cabbi.bio/outreach
